1 Course Objective

This course introduces the basic concepts of game theory. The emphasis is on the unifying perspective that game theory offers to questions in economics, other disciplines, and everyday life. It will enable students to view social interactions as strategic games, to use game theoretic concepts to predict behavior in these interactions and to conceive of ways in which altering the game affects social outcomes.

5 Course Requirement and Evaluation

- Evaluation will be based upon written assignments (20%), class participation (5%), a midterm (30%), and a final exam (45%).
• Weekly assignments (5-6 times) will be handed out. They are due at the beginning of class the following week. It will be collected in class. Late submission is not accepted in any circumstances.

• Note that only simple answers for the assignments will be provided. Students are responsible to obtain the detailed solution by discussing with classmates, peers, teaching assistants, and me.

• The midterm exam contains all the materials covered before the exam, and is scheduled on October 18, Wednesday, during the class time. The final exam contains all the materials covered throughout the semester. In the case of absence at an exam due to medical reasons, the student is required to submit medical certificate issued by a registered medical practitioner. Appropriate documentation will be required for absences due to other reasons. Announcements, lecture slides, and supplementary materials (if any) will be updated onto the course website at Canvas.ust.hk. If a student finds difficulties in the course and has any concern about the course, it is his/her benefit to contact me or the teaching assistant at the early stage.
