LSK 4063  Office hours: Mon 9:00 – 10:30 am

Course description
It could be argued that economic growth and development are the most important topics that economists study. Governments all over the world worry about their countries’ economic growth, and most individuals are concerned about their economic and social wellbeing. So, for economists and indeed all interested citizens, it is useful to understand how economies grow, what it means for an economy to be developed, and what barriers individuals and countries face in achieving development.

We will work through a set of topics that will all contribute to this understanding. These include the measurement of human development, poverty and inequality, barriers to development with a focus on land, credit and insurance markets, education and health.

Development economics is a broad subject, and we do not have the time for an exhaustive treatment of all the topics that have been examined in the literature. The group self-study requirement will allow you to explore in greater depth one particular topic, even if it is not discussed in my lectures. A full list of the group self-study topics is available on Canvas.
Course Intended Learning outcomes (CILOs)

Students who complete this course successfully will be able to:

1. list the features of underdevelopment (ECOF 3, 6; BBA 4.1, 6)
2. explain the links between income, non-income factors and human wellbeing (ECOF 3, BBA 4.1, 4.3)
3. define basic measures of underdevelopment, poverty and inequality, and critique their usefulness (ECOF 1.2, 4.1, 4.3; BBA 1.2, 4.1, 4.2, 4.3, 4.4)
4. describe market imperfections and explain in their own words how market imperfections may impede growth (ECOF 4.2, 4.3, BBA 4.1, 4.2)
5. conduct simple theoretical analyses of agrarian land, credit and insurance markets (ECOF 4, BBA 4.2, 4.4)
6. articulate how the education and health sectors tend to operate in developing countries, the major barriers to high achievement and understand the factors behind them (ECOF 4.2, 4.3, 4.5, BBA 4.2, 4.3, 4.4)
7. formulate and carry out a secondary research project (ECOF 1.3, 1.4, 7.2, 7.3; BBA 1.3, 1.4, 7.2, 7.3)
8. analyze economic phenomena observed in the developing world (ECOF 6, 9; BBA 6, 9)

The course will also provide students the opportunity to:

9. argue, convince and work effectively with team members (ECOF 5; BBA 5)
10. develop written and oral communication skills in English (ECOF 2; BBA 2)

Prerequisites

You must have taken at least ECON 3133 (previously known as ECON 200) or ECON 3014 (previously known as ECON 214) successfully to enrol in this course.

I will assume that you know core concepts in calculus and microeconomics. Please review these if you feel uncertain.

Learning resources

- Lecture notes will be posted on the course website. However, it is possible that some material discussed does not appear in the lecture notes. **You will be responsible for all material discussed in class and in the assigned readings, whether or not it appears in the lecture notes.**

---

1Numbers in parentheses are specific Programme Intended Learning Outcomes (PILOs) for the ECOF and BBA programmes respectively.
• We will use the course website for announcements, to post assignments and your homework and exam grades. Please check it regularly.

• The material in this course draws on different textbooks and journal articles. The reading list is below. Readings marked with a † will be on reserve in the library. For the others, click on the hyperlink.

Reading List

TL †Taylor, J. Edward and Travis J. Lybbert (2015), Essentials of Development Economics, University of California Press. (Chapters 6 and 12.)

Please contact the TA if you have trouble locating any of the reading material.
Learning environment

Meetings/Lessons
We will meet twice a week during the lecture slot. The tutorial slot will generally not be used, but may need to be used if I am unable to hold a scheduled lecture due to unforeseen circumstances. Classes will mainly be in lecture format (this addresses CILOs 1-6), but we will have (ungraded) in-class exercises and one (graded) group project (these address CILOs 7-10).

Groups
All students must sort themselves into groups of 4-5 members each. (Groups smaller than 4 are discouraged; groups larger than 5 are not allowed.) Each group will together choose one self-study topic, read and discuss the review article in detail, check additional sources as needed, and prepare a presentation for the rest of the class. Please finalise your group by Monday, September 19 and submit the information to your TA.

Participation
I welcome, and do my best to encourage, class participation. At any time, please feel free to interrupt me to ask questions or make comments. I will also ask questions and expect you to answer. Please do not worry about whether your answer is “correct” or “incorrect”. Often what is incorrect according to a particular viewpoint is correct according to another viewpoint. The questions are not meant to test you. Instead, I am interested in finding out what you think and why you think it, and then we can build the discussion from there.

Policy on Mobile Devices
I think of our lectures as a conversation. This means that both sides need to be engaged. It hurts my feelings if I am talking to people but they are looking at their phones or computers instead of looking back at me. If you need to check or send an urgent message, or even talk to someone on the phone, please step out of the class to do this, and then return when you are once again able to pay attention to our discussion.
Assessment scheme

Class Participation 5% (CILO 10)
Your class participation score will depend on how often you raised questions, answered questions or made comments. Students who participate more actively will get more marks. *Attendance and participation are not the same thing*, although of course one is a necessary condition for the other!

Homework 10% (CILOs 1-8)

- There will be three homework sets.
- They will be based on the readings and material discussed in class. This homework is meant to give you a chance to revise the material, and to see what is expected of you. My emphasis is that you try to answer the questions and in the process think about and learn the material in greater depth. So I hope that for your own sake, you will attempt to answer the questions yourselves, and not copy old answers or your friends’ homework.
- Homework will be due in *hard copy* at the beginning of class, on the specified date. Late submissions will not be entertained.2
- Each student must submit their own individual homework.
- Homework must either be typewritten or written in clear, legible handwriting. Please staple all pages together, and write your name on the front page.
- When calculating the homework total, your lowest-scoring homework will receive a weight of 2%, and the other two homework sets will receive a weight of 4% each, to add up to 10% in total.

Midterm Exam 25% (CILOs 1-6, 10)
The midterm exam will be held in a lecture slot on **Thursday, October 12**. The venue will be our regular classroom (LSSK 1005). This will be a closed-book exam based on the material covered from the beginning of the course until October 14 (inclusive). Please mark the date on your calendar now – it is not possible to schedule make-up exams (see footnote 2). To help you prepare for the mid-term, on **Tuesday, October 10** your TA will lead a review session during the tutorial slot (11:00 – 11:50 am in LSK 1014).

Group Self-study 30% (CILOs 1-9)
Development economists have studied a very large number of topics, and one semester is not long enough to touch on all of these. The group self-study requirement allows you to study a particular topic in greater detail.

---

2Exceptions will be made only under the gravest circumstances. I will follow up to confirm the situation.
You will be expected to self-select into a 4-5 person group, and then select one topic from the list provided. You will then be expected to read and critically analyse the relevant review article, and then make a presentation to the class about it. You will receive a score based on your presentation, and how well you answer questions from the audience. The list of topics and review articles is available on Canvas. Group information is due in class on Tuesday, September 19.

**Final Exam 30% (CILOs 1-6, 10)**

The final exam will be held on the date fixed by the Registrar’s office. Please refer to the final examination timetable posted by the Academic Records and Registration Office. Please note: The final exam will cover material from after the midterm until the end of the course.

**ECON 4670: Economics Research and Communication**

This course is *not* listed as one of the courses that will help you pass ECON 4670. However, interested students may take their Group Self-Study project as a starting point, do an additional literature review and write a 10-page individual paper that they may submit as an ECON 4670 paper. The deadline for this submission will be in mid-January. Students who are interested in pursuing this option should inform me no later than the date of the midterm exam. More details will be provided to interested students after the midterm exam.

**Academic honesty**

Academic dishonesty is immoral and unfair, and I take a very serious view of it. You must be aware of HKUST’s policy on academic integrity, and abide by its provisions. I will report all cases of suspected misconduct to the Dean’s Office, and their decision will be final and binding.

Please be especially careful not to plagiarize. Many students plagiarize without realizing what they are doing. For example, any text that you quote directly from another source must be included in quotation marks, and referenced correctly. If you do not include quotation marks, the words must be your own. If we detect plagiarism on written assignments we will penalise it.
