### Course description

This course will help students understand the macroeconomic and financial linkages between domestic and foreign countries. Topics include the international financial market environment, the impacts of exchange rate fluctuations, mechanism of adjustment, the operation of the exchange rate systems in developing and developed countries, the international monetary system, and the relationship among money, output, exchange rates, interest rates and prices.

### Course objectives

This course is about international macroeconomics and international finance. It will help students understand the macroeconomic and financial linkages between countries. Topics include national income accounting, the balance of payments, the operation of the exchange rate systems in developing and developed countries, the international capital market, the international monetary system, and the mechanisms of adjustment of exchange rate, interest rate, current account balance, output and price level in response to monetary and fiscal policies.

### Learning outcomes

At the end of this course, it is expected that students would be able to

1. Understand national income accounting, balance of payments, the foreign exchange market, the different exchange rate regimes, the global capital market, the international monetary & financial system, financial globalization and issues with developing countries.

2. Analyze the short-run and long-run relationship between monetary policy, fiscal policy, trade balance, price level, exchange rate, interest rate, output and unemployment in an open economy.

3. Apply the tools they learn to analyze real world economic issues that are related to the above topics.

### Teaching Approach

This course is primarily delivered through lectures, tutorials, class discussion and homework.

Teaching and Learning Activities	Roles in the Course	Course Learning Outcome addressed
Lectures with in-class discussions	Explain key concepts and models to students	1, 2, 3
Tutorials	Review basic model and concepts, practice problem-solving, explain answers to homework and exams	1, 2, 3
Homework assignments	Practice problem solving, apply models to analyze international economic issues	2, 3

### Reading Material

#### Required textbook:

Krugman, Obstfeld and Melitz, *International Finance: Theory and Policy*, eleventh edition, Pearson Publisher (abbreviated as KOM)

Students are required to purchase the “value-package” which includes the textbook together with access to “MyEconLab”, the online learning system the access of which is sold together with the textbook.

#### Supplementary textbook (you can find it in the library):

Feenstra, Robert C. and Taylor Alan M., *International Economics*, 2<sup>nd</sup> edition, Worth Publishers (abbreviated as FT)

Supplementary reading material will be posted for students to download during the semester.

### Assessment

Assessment Activities	Weighting	Relevant information	Course learning outcomes assessed
Final Examination (closed book)	40%	Date: TBA	1,2
Mid-term exam 1 (closed book)	22.5%	Date: TBA, in class	1, 2
Mid-term exam 2 (closed book)	22.5%	Date: TBA, in class	1, 2
Homework assignments (about five to six)	10%	Need to submit, and credits will be given if seriously attempted	1, 2, 3

Participation	5%	Attendance, asking and answering questions in class and tutorial	1, 2, 3
---------------	----	--	---------

The earlier part of the course will be tested in two mid-term examinations. The mid-terms are in-class, and each lasts for one hour and twenty minutes. The dates of the mid-terms are listed in the above table. You must take them on those dates. The final examination is three-hour long and will cover all the material taught in the course, with an emphasis on the later part of the course. The final examination will be held during the regular examination period.

Any excuse of absence from the mid-term and final exams due to conflicts with other activities will not be accepted, and no make-up exam will be given. Moreover, if you do not take a midterm or final exam for whatever reason, you will get zero mark for that exam. No shifting of weights to other parts of the assessment will be allowed.

About six problem sets will be given. When a problem set is due and submitted, the answers will be discussed in the tutorial. No late submission will be accepted.

Student participation is taken seriously. Attendance will be taken in each class and tutorial. Students are expected to have read the relevant material before coming to class/tutorial, and to come prepared with questions. It must be emphasized that participation is not simply being there. Those who do not participate actively may be given “cold calls”.

### **Plagiarism and cheating**

Plagiarism and cheating in exams, tests and assignments are serious offences. The university takes these cases seriously. If you are found guilty, you can be failed for the class and even expelled from the university.

If there is evidence that you copy problem set answers from each other or some leaked answer key, that is considered cheating.

## **Reading List**

Introduction

KOM Chapter 1

I. The Balance of Payments

KOM Chapter 2

II Model of the Foreign Exchange Market

KOM Chapter 3

III. The theory of international macroeconomics

KOM Chapters 4-7

IV. International monetary system

KOM Chapters 8

IV. The Global Capital Market and Developing Countries Issues
